New York

*American Council of Engineering
Companies of New York*

**Reception &
Dinner Dance**

**Saturday,
March 29, 2008**

**The Grand Ballroom
The Waldorf-Astoria
Park Avenue at 50th Street
New York City**

BEST PANEL AWARD

Best Panel Award is awarded to the firm who best communicates engineering excellence through the creation of a panel that is visually exciting and stimulating to read, as well as, promoting the achievements of the engineering profession.

EXTENDING LIGHT RAIL IN NEWARK

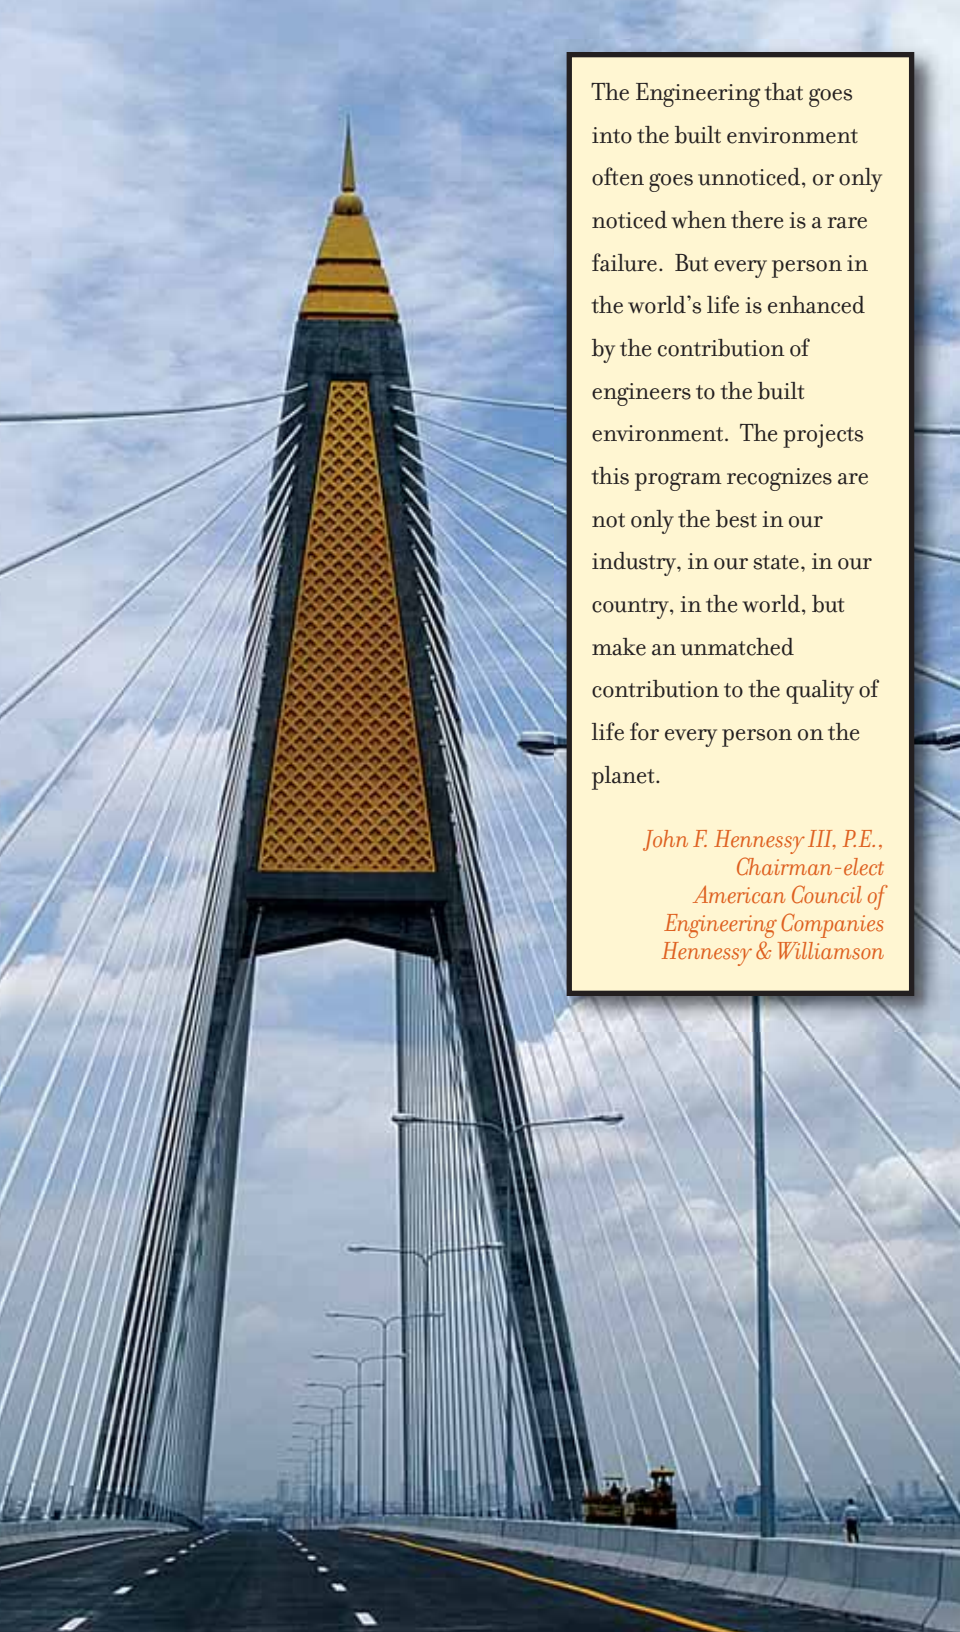

The Newark Light Rail Extension to Broad Street Station connects two of New Jersey Transit's busiest train stations to the city's downtown district. The joint venture team oversaw the construction of the one-mile light rail line, which included five new stations and a new 800-foot double track tunnel that connected to an existing tunnel. The complex project was completed on time and within budget. In addition to serving as a catalyst for economic development in Newark, the new line allows travelers to conveniently

connect to five NJ Transit commuter rail lines, Amtrak and PATH trains as well as many bus lines.

As they worked in, around and under the streets of Newark, the team successfully minimized disruptions to pedestrian and vehicular traffic and business establishments adjacent to construction zones by meeting frequently with various stakeholders to coordinate construction with their needs. They also closely monitored contractor activities to limit impacts to the community.

The Engineering that goes into the built environment often goes unnoticed, or only noticed when there is a rare failure. But every person in the world's life is enhanced by the contribution of engineers to the built environment. The projects this program recognizes are not only the best in our industry, in our state, in our country, in the world, but make an unmatched contribution to the quality of life for every person on the planet.

*John F. Hennessy III, P.E.,
Chairman-elect
American Council of
Engineering Companies
Hennessy & Williamson*

Welcome

to the 2008 Engineering Excellence Awards (EEA) Gala! EEA recognizes engineering achievements that demonstrate the highest degree of ingenuity from our member firms.

Each year a distinguished panel of judges selects the finest engineering designs, plans and studies by New York State consulting engineering firms, based on criteria such as uniqueness and originality; technical value to the engineering profession; social and economic considerations; complexity, and success in meeting client goals. The result -- 30 Diamond Awards, the highest award given at the state level, and 102 Platinum, Gold and Silver Awards.

Tonight we celebrate these projects to remind both the public and ourselves of the good and important work consulting engineers do every day.

A large, dark, irregularly shaped rock is being lowered or positioned against a light-colored concrete wall. The rock is suspended by a complex network of thick, grey steel cables that form a mesh-like structure around it. A prominent yellow cable runs diagonally across the scene. To the right, a brick building with a metal downspout is visible. The background shows a steep, rocky hillside under a bright sky.

“The competition is an occasion to celebrate the great depth and breadth of knowledge and imagination inherent in the New York engineering community by recognizing, through these awards, the sophistication and complexity of the accomplishments of its member firms.”

Innovative Solutions Meet Client Needs

We applaud the New York City Department of Environmental Protection on winning the Silver Award in the category of Studies, Research and Consulting Engineering Services for the North River WPCP - Managing Risk with Limited Funds project. Our partnership with NYCDEP and receipt of this award is recognition of the innovative approach employed by NYCDEP in implementation of its first-ever risk-based comprehensive database of capital investment requirements. Congratulations on this achievement and thank you for the opportunity to be part of it.

Join Us for Donovan Hatem's 2008 Design Professional Roundtables

This marks our 16th year, providing the design and construction management professional community with a forum for education and discussion on timely, relevant topics including risk management, liability, trial, and general business matters, to name a few.

We hope you will join us as we explore these various topics and exchange ideas in the upcoming months.

in New York

January 31	AIA Contract Revision Review and New AIA Documents
March 19	Design Responsibility in Integrated Project Delivery
June 4	False Claims Act Exposure for Design and Construction Management Professionals
September 25	Third-Party Liability for Design Professionals: The Pendulum Begins to Swing Back
December 4	Anatomy of a Trial for Architects and Engineers

Dates and topics subject to change.

About Donovan Hatem

With offices in New York and Boston, the Professional Practices Group at Donovan Hatem includes more than 40 attorneys who provide highly-specialized counsel to engineers, architects, and construction managers. Our experienced trial lawyers represent design professionals in jury and non-jury cases in the northeast and nationwide, and at mediations, arbitrations, and other dispute resolution forums. In addition to professional liability claims defense, Donovan Hatem's scope of expertise encompasses risk management, contract review, and general business matters.

To learn more, to register for an upcoming roundtable, and to join our Design Professional Roundtables mailing list, please visit our website at donovanhatem.com.

Congratulations to the New York City Department of Environmental Protection

Croton WTP Site Preparation, ACEC NY Diamond Award

In preparation for the construction of the New York City's first water treatment plant, the joint venture of Mecalf & Eddy/Hazen and Sawyer designed and managed construction of the Croton WTP site preparation contract. This major effort involved careful planning to minimize building footprint on a tight site, and coordination of complex construction (including removal of over 1,000,000 cy of rock and soil from an excavation spanning 700 feet x 575 feet), coupled with efforts to minimize noise, dust, and visual impacts.

Congratulations to the Aquarion Water Company

Stamford Water Treatment Plant, ACEC NY Platinum Award

Hazen and Sawyer designed a major upgrade to the Stamford Water Treatment Plant, increasing its capacity from 24 to 30 million gallons per day. The upgrade reused existing facilities while utilizing technical innovation and feedback from the community to minimize the new building footprint. Energy-saving measures were implemented and environmental considerations, such as minimizing impacts on nearby wetlands, were also addressed. The facility remained in operation during the entire duration of construction.
