

**Build a Better**

**Business Climate**

### **An Agenda for Fiscal Responsibility and a Stronger New York:**

- **Capital investment** that meets New York's growing infrastructure needs—for bridges, tunnels, energy, roads, transit, airports and water systems
- **Jobs creation** through mandate relief measures and pension cost reductions that will free up funds for public works projects and put thousands of New Yorkers back to work
- **Extension of Qualifications-Based Selection (QBS)** requirements to public authorities and public benefit corporations for higher quality design
- **Implementation of alternative project delivery methods** such as design-build and public-private partnerships to accelerate infrastructure projects, decrease costs and leverage private equity
- **Cost-effective delivery** of engineering services through greater use of private design firms
- **Indemnification** that ensures engineers are responsible for only the work they perform
